TOXICOLOGY

Subject Index Volume 87 (1994)

aerolysin, *Aeromonas hydrophila*, pore-forming, toxin, dimer, oligomerization, 19
Aeromonas hydrophila, aerolysin, pore-forming, toxin, dimer, oligomerization, 19
amoebapore, membrane-active peptide, amphipathic helix, ion channel, 5
amphipathic helix, amoebapore, membrane-active peptide, ion channel, 5
antibacterial, synthetic peptides, toxin, channel formation, 109
antifungal and antibacterial activities, peptide cycle, pore-forming lipopeptides, *Bacillus subtilis*, cell membrane permeability, 151
antimicrobial, cytotoxic, leukocyte, peptide, pore-forming, 131

Bacillus subtilis, pore-forming lipopeptides, cell membrane permeability, antifungal and antibacterial activities, peptide cycle, 151
bacterial toxin, colicin, pore-forming, tol, immunity, 85

Cecropins, magainins, *Defensins*, membrane permeabilization, ion channels, liposomes, planar lipid bilayers, 175
cell membrane permeability, pore-forming lipopeptides, *Bacillus subtilis*, antifungal and antibacterial activities, peptide cycle, 151
Cerebratulus, cytolysin, marine, membrane, protein, toxin, 189
channel formation, synthetic peptides, toxin, antibacterial, 109
channel size, voltage gating, protein translocation, voltage-dependent block, 29
colicin, pore-forming, bacterial toxin, tol, immunity, 85
complement, complement-mediated cell death, membrane attack complex (MAC), 229
complement-mediated cell death, complement, membrane attack complex (MAC), 229
cytolysin, *Cerebratulus*, marine, membrane, protein, toxin, 189
cytolysins, pore-former, *Pseudomonas aeruginosa*, cytotoxin, 69
cytolytic toxin, sea anemone, hemolysis, pore-forming toxin, sphingomyelin, liposome, 205
cytotoxic, antimicrobial, leukocyte, peptide, pore-forming, 131
cytotoxin, pore-former, *Pseudomonas aeruginosa*, cytolysins, 69
Defensins, magainins, *Cecropins*, membrane permeabilization, ion channels, liposomes, planar lipid bilayers, 175

dimer, aerolysin, *Aeromonas hydrophila*, pore-forming, toxin, oligomerization, 19

enterotoxins, membrane-active toxins, plasma membrane, permeability alterations, 43
erythrocytes, RTX toxins, hemolysin, leukotoxin, pore-formation, lipid vesicles, planar lipid bilayers, 249

hemolysin, RTX toxins, leukotoxin, pore-formation, erythrocytes, lipid vesicles, planar lipid bilayers, 249
hemolysis, sea anemone, cytolytic toxin, pore-forming toxin, sphingomyelin, liposome, 205

SSDI 0300-483X(94)02831-E

immunity, colicin, pore-forming, bacterial toxin, tol, 85
ion channel, amoebapore, membrane-active peptide, amphipathic helix, 5
ion channels, magainins, *Cecropins*, *Defensins*, membrane permeabilization, liposomes, planar lipid bilayers, 175

leukocyte, antimicrobial, cytotoxic, peptide, pore-forming, 131
leukotoxin, RTX toxins, hemolysin, pore-formation, erythrocytes, lipid vesicles, planar lipid bilayers, 249
lipid vesicles, RTX toxins, hemolysin, leukotoxin, pore-formation, erythrocytes, planar lipid bilayers, 249
liposome, sea anemone, cytolytic toxin, hemolysis, pore-forming toxin, sphingomyelin, 205
liposomes, magainins, *Cecropins*, *Defensins*, membrane permeabilization, ion channels, planar lipid bilayers, 175

magainins, *Cecropins*, *Defensins*, membrane permeabilization, ion channels, liposomes, planar lipid bilayers, 175
marine, *Cerebratulus*, cytolysin, membrane, protein, toxin, 189
membrane, *Cerebratulus*, cytolysin, marine, protein, toxin, 189
membrane attack complex (MAC), complement, complement-mediated cell death, 229
membrane permeabilization, magainins, *Cecropins*, *Defensins*, ion channels, liposomes, planar lipid bilayers, 175
membrane-active peptide, amoebapore, amphipathic helix, ion channel, 5
membrane-active toxins, enterotoxins, plasma membrane, permeability alterations, 43

oligomerization, aerolysin, *Aeromonas hydrophila*, pore-forming, toxin, dimer, 19

peptide, antimicrobial, cytotoxic, leukocyte, pore-forming, 131
peptide cycle, pore-forming lipopeptides, *Bacillus subtilis*, cell membrane permeability, antifungal and antibacterial activities, 151
permeability alterations, enterotoxins, membrane-active toxins, plasma membrane, 43
planar lipid bilayers, magainins, *Cecropins*, *Defensins*, membrane permeabilization, ion channels, liposomes, 175
planar lipid bilayers, RTX toxins, hemolysin, leukotoxin, pore-formation, erythrocytes, lipid vesicles, 249
plasma membrane, enterotoxins, membrane-active toxins, permeability alterations, 43
pore-formation, RTX toxins, hemolysin, leukotoxin, erythrocytes, lipid vesicles, planar lipid bilayers, 249
pore-former, *Pseudomonas aeruginosa*, cytotoxin, cytolysins, 69
pore-forming, aerolysin, *Aeromonas hydrophila*, toxin, dimer, oligomerization, 19
pore-forming, antimicrobial, cytotoxic, leukocyte, peptide, 131
pore-forming, colicin, bacterial toxin, tol, immunity, 85
pore-forming lipopeptides, *Bacillus subtilis*, cell membrane permeability, antifungal and antibacterial activities, peptide cycle, 151
pore-forming toxin, sea anemone, cytolytic toxin, hemolysis, sphingomyelin, liposome, 205
protein, *Cerebratulus*, cytolysin, marine, membrane, toxin, 189
protein translocation, voltage gating, channel size, voltage-dependent block, 29
Pseudomonas aeruginosa, cytotoxin, pore-former, cytolysins, 69

RTX toxins, hemolysin, leukotoxin, pore-formation, erythrocytes, lipid vesicles, planar lipid bilayers, 249

sea anemone, cytolytic toxin, hemolysis, pore-forming toxin, sphingomyelin, liposome, 205
sphingomyelin, sea anemone, cytolytic toxin, hemolysis, pore-forming toxin, liposome, 205
synthetic peptides, toxin, antibacterial, channel formation, 109

tol, colicin, pore-forming, bacterial toxin, immunity, 85
toxin, *Cerebratulus*, cytolysin, marine, membrane, protein, 189
toxin, aerolysin, *Aeromonas hydrophila*, pore-forming, dimer, oligomerization, 19
toxin, synthetic peptides, antibacterial, channel formation, 109
voltage gating, protein translocation, channel size, voltage-dependent block, 29
voltage-dependent block, voltage gating, protein translocation, channel size, 29
